

Strathcona County School Traffic Safety Partnership (STSP)

The STSP is a collaborative group of school traffic stakeholders with a mandate to improve safety and traffic management near Strathcona County schools.

We wanted to reach out to parent councils in Strathcona County to update everyone on what the STSP does, and how we can help you manage traffic concerns at your school.

Visit our website at <http://www.schooltrafficsafety.com/>

School Traffic Management Plans

We have worked with most schools in the County to develop traffic management plans that can be used to communicate to parents and staff the desired traffic flow around the school to maximize safety.

Plans were completed first where traffic concerns were brought to our attention, and we are continuing to work through the list.

If you don't see your school listed under the "Toolkit- Traffic Plan Maps" tab, and you have concerns about traffic, contact me and we can make plans to get started on a traffic management plan.

Traffic Safety Resources and Activities

Drivers parking on crosswalks around your school? Kids jaywalking? We see the same problems at many of our schools. Don't reinvent the wheel!

Our website has many ideas and can connect you to resources that can be used to educate parents and students about traffic safety in a way that is tailored to the needs of your school.

Have an idea to improve safety at your school but need resources?

The STSP offers Traffic Safety Grants of up to \$250 for school communities to undertake traffic safety initiatives at their site.

Thanks for taking the time to learn about the STSP. Visit our site and check it out.

If you have any questions, feel free to contact me.

Best,

Debbie Rawson
